

GREG MITCHELL

Partnerships, Client Solutions & Technical Leadership | AdTech | Martech | Data
Longmont, CO | 01greg@gmail.com | 321-388-3962 | linkedin.com/in/gmitchell1

SUMMARY

Builds data and technology partnerships and turns business needs into practical solutions. Background spans agencies and enterprise technology companies across adtech and martech. Combines hands-on experience in data engineering and measurement with enterprise client relationship management. Has managed a 13-person remote team and brought new data offerings to market in collaboration with partners and internal teams.

CORE COMPETENCIES

Data & Technology Partnerships | Enterprise Client Relationships | Solutions Engineering & Technical Pre-Sales | Data Integrations | New Product Initiatives | Identity Resolution | Measurement & Attribution | Data Engineering & Analytics | AWS & Cloud Data Platforms | SQL & Python | Team Management | Cross-Functional Collaboration

EXPERIENCE

Director, New Initiatives | Path2Response LLC

2023 - 2026

Responsible for the partner ecosystem, technical integrations, and go-to-market support for a first-party data and direct mail co-op business.

- Managed relationships with eight data and technology partners, including Merkle/4Cite, Zeta, Skydeo, El Toro, Wunderkind, and Visual Visitor. Partner-sourced data volume nearly doubled over two years.
- Guided the integration of the company's first-party dataset into the LiveRamp marketplace, opening distribution to more than 50 DSPs and audience platforms and creating a new revenue channel.
- Handled each partner relationship from evaluation and technical scoping through contract alignment, onboarding, launch, and ongoing management.
- Helped launch new data products by identifying the right partners, shaping requirements with internal teams, and providing technical pre-sales support.
- Evaluated additional audience distribution partners, including Eyeota and Skydeo, and onboarded those that extended marketplace reach beyond LiveRamp.
- Cut client onboarding from more than seven days to one business day through process redesign, automation, and clearer ownership.

Associate Director of Analytics | Spark Foundry

2021 - 2023

Directed a 13-person remote analytics and data engineering team supporting a large pharmaceutical client. The team owned analytics strategy, measurement, reporting infrastructure, and data platform development.

- Served as the senior relationship lead across client, media, analytics, and engineering stakeholders, including executive communication and cross-team decisions.
- Led the migration from fragmented legacy systems into a centralized AWS environment, which improved reliability, scalability, and measurement capabilities.
- Introduced repeatable onboarding, delivery, and documentation processes that reduced operational friction and made the team easier to scale.
- Coached team members through cloud upskilling, and four direct reports earned AWS certifications.

Solutions Engineering Manager | Aqfer**2020 - 2021**

Established the client-facing solutions function during an early growth stage for an enterprise data platform serving adtech and martech use cases.

- Guided solution design and relationship management for 12 enterprise clients, including Acxiom, U.S. Bank, MLB, and Vevo.
- Acted as the technical lead in pre-sales, covering discovery, solution scoping, product positioning, and deal qualification.
- Designed client-specific integration workflows for advertising and marketing data, and partnered with engineering to turn recurring needs into reusable product capabilities.
- Set up delivery processes, ticketing, and QA standards that supported growth without proportional headcount increases.

Data Operations Engineer | Goodway Group**2018 - 2020**

- Built and maintained ETL pipelines that brought advertising platform and third-party data into the central analytics environment.
- Partnered directly with clients to improve website tagging and data collection, which strengthened attribution accuracy and reporting quality.
- Produced campaign analytics, operational reporting, and data quality improvements using SQL, Python, and Tableau.

Lead Data Analyst and Solutions Manager | J.D. Power**2011 - 2018**

Managed measurement and attribution engagements for more than 30 automotive clients, including tier-one manufacturers and dealer groups.

- Owned the primary relationship for enterprise automotive accounts, translating business goals into measurement solutions and supporting long-term retention.
- Delivered online-to-offline attribution products built on an early proprietary data clean room, which joined website pixel data with offline vehicle purchase records in a privacy-safe environment.
- Provided detailed campaign measurement and executive reporting for OEMs and tier-2 automotive clients based on those matched results.
- Coordinated tracking pixel implementations across OEM and dealer websites, working with clients, advertising partners, analytics, and engineering teams.
- Standardized reporting and delivery processes for large-scale automotive marketing and measurement programs.
