GREG MITCHELL

Digital Analytics & Tagging | Measurement & Attribution | Technical Leadership
Longmont, CO | 01greg@gmail.com | 321-388-3962 | linkedin.com/in/gmitchell1

SUMMARY

Digital analytics and technical solutions leader with 14 years of experience across automotive, agencies, and enterprise data platforms. Hands-on experience implementing website tags using GTM, Tealium, and Ensighten. Worked with client data layers from initial discovery through implementation and ongoing maintenance. Led a 13-person analytics and data engineering team and managed pixel implementation for a measurement product across 20 automotive clients.

CORE COMPETENCIES

Google Tag Manager (GTM) | Tealium & Ensighten | Website Tags & Data Layers | Google Analytics 4 (GA4) | Tracking Pixels | Tagging QA & Troubleshooting | Measurement & Attribution | Data Quality & Validation | SQL & Python | AWS & Data Engineering | Vendor & Client Management | Cross-Functional Leadership

EXPERIENCE

Director, New Initiatives | Path2Response LLC **2023 - 2026**

Led data and technology partnerships, integration requirements, and technical implementation support for a first-party data and direct-mail co-op business.

- Installed tracking tags directly in clients' Google Tag Manager (GTM) containers, supporting 300+ active tags across e-commerce client sites that required ongoing monitoring and validation.
- Built an internal pixel-monitoring tool to identify tracking errors and worked with client teams to troubleshoot tagging and measurement issues.
- Implemented GA4 tracking through Google Tag Manager and helped the marketing team build GA4 reporting.
- Managed eight external data and technology partner relationships, resolving technical requirements with vendors and internal teams; partner-sourced data volume nearly doubled over two years.
- Guided first-party audience integration into LiveRamp, reaching 50+ DSPs and audience platforms.
- Produced monthly and quarterly reports for the executive committee on tagging and licensed data product activity, including progress on cost-savings goals and initiatives.
- Reduced client onboarding from more than seven days to one business day through process redesign, automation, and clearer ownership.

Associate Director of Analytics | Spark Foundry **2021 - 2023**

Led a 13-person remote analytics and data engineering team supporting a large pharmaceutical client, responsible for measurement, reporting infrastructure, and data platforms.

- Served as senior client and stakeholder lead, aligning measurement priorities across media, analytics, engineering, and executive teams.
- Led the migration of legacy reporting systems to AWS, consolidating data workflows and improving reporting reliability.
- Established repeatable onboarding, delivery, documentation, and QA processes across the analytics function.
- Coached team members through cloud upskilling; four direct reports earned AWS certifications.

Solutions Engineering Manager | Aqfer **2020 - 2021**

Established the client-facing solutions function for an enterprise data platform serving advertising and marketing measurement use cases.

- Led technical discovery and solution design for 12 enterprise clients, including Acxiom, U.S. Bank, MLB, and Vevo.
- Served as client-facing technical lead for requirements, solution scoping, product demonstrations, and implementation questions.
- Designed client-specific data integration workflows and worked with engineering to resolve data and implementation requirements.
- Established issue tracking, delivery documentation, and QA standards to support a growing client base.

Data Operations Engineer | Goodway Group **2018 - 2020**

- Built and maintained ETL pipelines that brought advertising and third-party data into a central analytics environment.
- Worked directly with clients to improve website tagging, tracking pixels, data collection, and measurement troubleshooting.
- Served as a technical point of contact for clients, configuring and troubleshooting Google Analytics event tracking and parameters.
- Produced campaign analytics, reporting, and data quality improvements using SQL, Python, and Tableau.

Lead Data Analyst and Solutions Manager | J.D. Power (Korrelate, acquired 2014) **2011 - 2018**

Managed digital measurement and attribution programs for 20 automotive clients, including manufacturers and dealer groups.

- Led a team that deployed tracking tags across client websites, assessing each environment and its tag management tools (GTM, Tealium, Ensighten) and data layers.
- Owned the technical relationship with automotive clients, translating campaign and business goals into measurable reporting requirements.
- Delivered online-to-offline attribution by matching website pixel data to vehicle purchase records in an early privacy-safe data environment.
- Produced campaign measurement, attribution analysis, and executive reporting for OEM, Tier 2, and automotive endemic clients.
- Standardized measurement reporting and delivery processes across automotive client programs.
